

DFA ERFA Group 4 – meeting in Lithuania November 2023

For the second time in 2023 the dynamic Erfa-group 4 including pig managers from some of the largest and most efficient pig producers in Europe meet to exchange experience. And to get the newest knowledge about protective measures and biosecurity, in order to prevent getting the terrible ASF disease into their herds.

The November meeting was located in Vilnius in Lithuania, and including visit at to two large pig farms in the southern part of the country. A lot of practical and technical production issues was presented and discussed.

Thanks so much to the company Idavang in Lithuania for opening their doors for the group, and also to Bjarne Vest from Vestin for giving the group the latest updates regarding biosecurity.

It was again a fruitful and cozy meeting for the dynamic group.

Best Regards,

Tom Axelgaard
