

DFA Feed Mill Seminar in November 2023

Primo November an energetic group of feed mill managers and farm managers from DFA member companies had a seminar located in beautiful Budapest in order to widen out their knowledge within sustainable feed production.

The group represents some of the largest European pork producers coming from 12 different companies and located in 10 European countries.

**Danish Farmers
ABROAD**

The seminar was arranged in corporation between the Dutch company DSM and Danish Farmers Abroad. The seminar focused on the substantial knowledge needed, when it comes to the exercise of producing more for less, by optimizing the use of eg. vitamins and enzymes, and how to eliminate mycotoxines in the feed.

The constant threat of ASF has been a hot topic, where the participants have been sharing their experience in keeping the optimum biosecurity on both the farms and the feed factories.
